

Regarding the matter of Pappas Telecasting Company offering free TV and radio time worth hundreds of thousands of dollars to support one political party over the other, this is not only illegal...which the FCC must investigate and challenge...it violates the stewardship of the public airwaves that Broadcasters are bound to uphold. This, along with similar recent actions by Sinclair, are clear examples why we must scale back on the number of stations any one entity can own. Democracy is not being served and the public interest is being violated on your watch.
